DAIS New Age IT Solutions & Services

Leading Success

Striving for the Highest Rank In Middle East
As IT Solution Providers & Infrastructure Builders

DAIS MIDDLE EAST

Introduction:

DAIS is a leading and fast-growing Saudi-based company offering next-generation IT Solutions and Services of unrivalled quality and outstanding value to the Middle Eastern market in general and the Saudi market in particular.

Our Vision:

To be the premier (elite) provider of varied, but coherent and customer-centric IT solutions and services, for diversified businesses in the Middle East and especially in Saudi Arabia.

Our Mission:

To provide all our customers with IT solutions and services that add maximum value to their businesses in the most affordable and economic manner and to deal in the true spirit of Teamwork with our clients, suppliers and partners.

Our Values:

Customer-Centric, Honesty & Integrity, Commitment, Quality, Excellence, Professionalism, Respect, Pro-Activeness and Creativity.

COMMUNICATION & NETWORKING

Secure, robust and reliable network infrastructures for businesses that demand cutting edge technology solutions.

- Telecommunication / IP Telephony Systems
- Cable Network Solutions
- Data Network Installation & Maintenance
- Fiber Optics Network Solutions
- Wireless Network Solutions
- Network Security, CCTV & Fire Alarm System Solutions
- VoIP Solutions & Video Conferencing

Our services cover all aspects of telephony and infrastructure, from Telephone Systems and Hosted Voice over IP, to Call Management, Wireless, Data Networks and Structured Cabling.

Combined, these services enable us to offer a true one-stop-shop solution to the communications requirements of today's agile small to enterprise sized businesses.

Telecommunication

- Office & Industrial Phones
- Cable Network System
- Premises Distribution System (PDS)
- Intelligent Multiplexes
- Supply, Installation, Maintenance and repair of Communication related equipment such as:
 - PABX (TELEPHONE EXCHANGE): Exchanges with various modern facilities and with different capacities (number of extensions).
 - CABLE NETWORK: Complete cable networks involved in large telephone systems and computer networks: Indoors, outdoors, direct buried, copper cables and Fiber Optic Cables.

- **Telephone / IP Telephony System**

Is a family of technologies, methodologies, communication protocols, and transmission techniques for the delivery of voice communications and multimedia sessions over Internet Protocol (IP) networks, such as the Internet. Other terms frequently encountered and often used synonymously with VoIP are IP telephony, Internet telephony, voice over broadband (VoBB), broadband telephony, and broadband phone.

- **Telepresence/Video Conferencing Solution**

Videoconferencing is a set of telecommunication technologies which allow two or more locations to communicate by simultaneous two-way video and audio transmissions. Videoconferencing to serve a conference or multiple locations rather than individuals.

Data Communication Systems

- Data Networks Installation and Maintenance
- Fiber Optic Cable Networks System
- Wireless Network Backbone System

We supply, install and maintain following type data networks system:

DATA NETWORKS INSTALLATION AND MAINTENANCE:

We supply install and maintain all types of data networks using Ethernet, fast Ethernet Gigabit Ethernet, network switches, Routers, their configuration (ipv4/ipv6) etc.

FIBER OPTIC CABLE NETWORKS SYSTEMS:

DAIS deals with different kinds of fiber cable networks systems and its components including single mode and multimode fiber cables.

WIRELESS NETWORK BACKBONE SYSTEM:

DAIS offers Lucent Technologies Wave solutions for point-to-point LAN connections or bored area coverage of Internet services for data transmission. DAIS supplies Lucent/AVAYA, IBM and 3Com products.

Access Control, Time and Attendance

- Multi-door Networking Controller
- Indoor/outdoor access control Unit
- Access control and time and attendance software
- Magnetic Lock

Network Security

- Control the traffic on your local or wide area networks to better manage and protect your data.
- Secure remote access for your mobile workforce.
- Protect against a range of network security threats to critical financial, customer, and employee data.

Private WAN Services: Secure, reliable connections for better control of your local or wide area network.

Private Point-to-Point Services: Dedicated connections for secure global communications.

Secure Gateway: Advanced services for a seamless migration to total IP.

IP CCTV Security System

Closed-circuit television (CCTV) is the use of video cameras to transmit a signal to a specific place, on a limited set of monitors.

Fire Alarm System

An automatic Fire Alarm System is designed to detect the unwanted presence of fire by monitoring environmental changes associated with combustion and associated systems to control the spread of fire and smoke.

Home Automation

Home automation is a field within building automation, specializing in the specific automation of homes for the comfort & security of residents.

Home automation covers many basic functions in the home including:

- Light and climate control
- Control of doors and window shutters
- Security and surveillance systems etc.
- Home entertainment and multi-media systems control.
- Automatic plant watering and pet feeding
- Automatic scenes for dinners and parties
- More user-friendly control interface.

Direct Internet Access (DIA)

DAIS-ME also setup, configure and support Direct Internet Access (DIA) on your network infrastructure, empowering you with all the information you need at your very fingertips, at the best possible speeds.

- ERP – SAP R/3, Quad's MFG/PRO, JD EDWARD and BPCS.
- Palm OS, Palm top application development

Application Development Tools

- Visual Basic, C, C++

Data Ware Housing

- Oracle Tools, Cognos

QUALITY & DELIVERY

Quality via Systems

Content accuracy is the key factor in the success of any data conversion. At DAIS, quality is created and certified via three integrated systems:

- Quality Control – a variety of production measures ensuring data is "clean", such as double-data capture, validation and parsing.
- Process-QA – our innovative process-control system, which keeps every step of our conversion process fine-tuned to exacting standards.
- Product-QA – our scientific, sample-based quality certification system applied to every batch of delivered data, prior to delivery to a customer.

Delivery Schedules

Our services are time-critical and mission-critical for our customers. This is taken very seriously at DAIS. We do whatever it takes to meet the delivery schedule and quality requirements all the time. We use a sophisticated suite of Logistic, Production and Quality management systems to make sure that data is delivered on-time. Due to our large capacity and communication infrastructure, we often work on projects that have a twenty four-hour turnaround time requirement.
